Attorney Docket: 37443

In the Abstract:

Please amend the paragraph of the "Abstract" as follows:

A method of performing an anastomosis, comprising, juxtaposing ~~two~~first and second blood vessels to be anastomosed using an juxtaposition device, to a desired configuration in which at least ~~one~~the first vessel is an end vessel; applying an adhesive to ~~said the~~ vessels while they are in ~~said the~~ configuration, ~~said the~~ adhesive being sufficient to ensure both sealing and bonding of ~~said the~~ two vessels to each other; and removing ~~said the~~ juxtaposition device after said adhesive sufficiently sets; wherein the juxtaposition device remains primarily external to at least the first vessel during the juxtaposing.
